

ONLINE CLASSES AND ME ○○○○

Due to the disease of Coronavirus all over India. My school has organised online classes. First, teachers used to do classes with the ZOOM-Cloud meetings. We couldn't hear them well and more over it was a chinese app so we didnot do classes on ZOOM. And for some time we didn't meet our teachers an but we did class on whatsapp.

Then our teachers started sending links on whatsapp and we started meeting the teachers regularly (according to the time-table) in Google meet. And this is better than the ZOOM classes because we don't need more connection to attend the classes. But still some times we can not join the meeting and even some times I have to on the captions because sometimes we can't hear them properly (that is the noise breaking). But still with any of the facility(s) I'm not satisfied. And I feel regular classes are far more better than the online classes because in our classrooms we can clear our doubts with the teachers but in online classes we can interact with teachers but our voice will reach the teachers late and sometimes some students will unmute themselves and will be making noises. Therefore, I conclude with

☺ ☺ "East or west classrooms
are the best" ☺ ☺
